1701 FRANCIACORTA

There is something that goes beyond scientific definitions. It is a regaining of the observational ability and sensitivity that the ancient farmers had, who followed the phases of the moon and knew how to pick up certain signals from the earth, plants and animals. Winery 1701 work to increase and maintain the fertility of the soil by nurturing its fundamental factor, humus. The deep connection with nature and the complete respect for its rhythms lead Winery 1701 to avoid the use of synthetic fertilisers and chemical pesticides.
